

Code	Feature	Application
Deodorise 100	- To eliminate bad odor of polymer	PE, PP, HIPS, PS, Nylon, ABS application such as blown film, injection moulding & compounding.
OB-1	- Whitening agent - To enhance the colour	PE, PP, HIPS, PS, Nylon, ABS application such as blown film , injection moulding & compounding.
UV909	- Anti-UV properties	PE, PP application such as blown film, injection moulding & compounding.
Flame Retardant	- Halogen free - Low smoke	PE, PP application such as injection moulding & compounding.
Anti-Static 11105	- To prevent dust - To inhibit electrostatic	PE, PP application such as injection moulding & compounding.
Clear 900S	- To reduce haze - To enhance clarity of PP - To reduce cycle time	PE, PP application such as injection moulding & compounding.
Purging Compound	- Cleaning agent	Compatible to all polymer.
Chlorinated Polyethylene	- Impact modifier	PVC application such as injection moulding, sheet & pipe extrusion.
C-PVC	- High chlorinated PVC resin & compound	PVC application such as injection moulding, sheet & pipe extrusion.
Glass Fiber	- Available in black & natural colour - To enhance polymer properties	PE, PP application such as injection moulding.
Silicone SIL-06	- Mould release. - Smoothness, scratch resistance and abrasion resistance	PP packaging film, automobile interior trim material, PP/ Talc TPO, BOPP, CPP films & others plastic in PP resin.
